SUMMARY

Technical Lead with 6+ years delivering production web applications across editorial, healthcare and enterprise. Architected the headless migration of Forbes Italia, led the Salernitana 1919 build and the L'Espresso editorial migration. Strong full-stack foundation (React, Next.js, Angular, Laravel, Node.js, Python) with two years of hands-on AI integration — LLM orchestration, RAG and agent workflows — that increasingly differentiates the products I ship. Native Italian, bilingual in English.

SELECTED PROJECTS

- **Forbes Italia — headless editorial platform (2024-present).** Architected the migration from legacy WordPress to a Next.js + Laravel + Python stack, with AI-assisted editorial features. Flagship delivery for one of Italy's highest-traffic news sites.
- **U.S. Salernitana 1919 — Serie A football club (2023-2024).** Set up the Laravel architecture from scratch, coordinated the delivery team and shipped on time.
- **L'Espresso — editorial platform migration (2023).** Orchestrated migration of a high-traffic legacy blog to a headless CMS with Next.js frontend, including XML data transformation and content integration.

EXPERIENCE

Technical Lead / Full-Stack Developer

Apr 2024 – Present

[IDI Group S.R.L.](#)

Naples, Italy

- Architect and deliver full-stack solutions for enterprise clients on React, Next.js, Angular, Laravel, Node.js, Python and GoLang stacks.
- Led the Forbes Italia headless migration (Next.js + Laravel + Wordpress) including integration of AI-powered editorial features.
- Design and integrate AI features — RAG pipelines, vector databases (Supabase, PostgreSQL), LLM orchestration across OpenAI, Claude and Gemini — that increasingly differentiate client deliveries.
- Provide technical leadership on architecture, code quality, stakeholder coordination and team mentorship.

Full-Stack Web Developer

Feb 2023 – Apr 2024

[The Medix](#)

Naples, Italy

- Led a 3-person frontend team; shipped Angular and React applications for healthcare-management products plus a React Native patient-engagement app.
- Led the U.S. Salernitana 1919 (Serie A) project: set up Laravel architecture from scratch, coordinated workflows, delivered on schedule.
- Orchestrated L'Espresso editorial migration to a headless CMS with Next.js frontend, including XML data transformation.
- Partnered with backend engineers and stakeholders on architecture decisions and set development best practices across projects.

Junior Web Developer

Nov 2020 – Feb 2023

[LAB46](#)

Naples, Italy

- Built Angular frontends and custom vTiger/PHP CRM extensions in a fast-paced digital-agency environment.
- Introduced Jira and Agile workflows that improved sprint velocity and team coordination.
- Delivered a React Native client-engagement app, managed Debian server infrastructure and built high-performance landing pages with Vite/Parcel and GSAP.

SKILLS

Frontend: React, Next.js, Angular, Astro, Vue, Svelte, Tailwind CSS, Material UI, SCSS, Three.js, GSAP

Backend: Node.js, Express, Laravel, PHP, Python

Mobile: React Native, Flutter

AI & LLM: LangChain, LangGraph, OpenAI, Claude, Gemini, RAG pipelines, vector databases, prompt engineering, Stable Diffusion

Data & Infra: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Docker, Linux/Debian, Git

Leadership: Team leadership (3+ devs), Agile/Jira, stakeholder coordination, architecture decisions

Languages: English (native), Italian (native), French (intermediate), Japanese (basic)

EDUCATION

- **Full-Stack Web Developer Bootcamp** — Boolean Careers, Milan (2020)
- **iOS Foundation Program** — Apple Developer Academy, Università L'Orientale, Naples (2017)
- **Comparative Literature & Languages (coursework)** — Università L'Orientale, Naples
